Certifications

Front End Libraries, *freeCodeCamp* — September 2020

- Built upon current web design knowlege in a practical way by exploring popular front end libraries including Bootstrap, Sass, and React Spring.
- Developed understanding of using state to craft complex user interfaces with hands-on work in stateful React applications and state management software such as Redux.
- Fused knowledge of HTML and JavaScript through JavaScript libraries including jQuery and React in order to build dynamic, real-world web applications.

JavaScript Algorithms and Data Structures, *freeCodeCamp* — July 2020

- Expanded programming toolkit with knowledge of JavaScript fundamentals, Object Oriented Programming, and Functional Programming
- Demonstrated algorithmic problem solving skills with both ES5 and ES6 syntax.

Responsive Web Design, *freeCodeCamp* — May 2020

- Mastered web design through HTML & CSS.
- Honed flexibility in coding by studying the principles of responsive web design, accessibility, CSS Flexbox, and CSS Grid.
